

# Project Update

## Talbot Road

For any further information or queries please email:  
mcf@amey.co.uk

Three major junction improvements will be completed on behalf of Trafford Council, taking us to Spring 2024:

- White City Way
- Great Stone Road
- Chester Road

The projects will see these junctions undergoing major reconfiguration into cycle friendly cyclops junctions including all new smart signals to cut down on unnecessary waiting, bike lanes and remodelling of traffic islands. Talbot Road is very busy and well used by local cyclists to get around. These works will make it easier and safer to use. The three junction improvements will see the creation of a safe continuous cycling and walking link through the centre of Trafford opening the area up for active travel, improving safety and taking cars off the road.

### Progress

The junction of Talbot Road and White City Way is now up and running and working well with more users benefitting from these improvements.

Work continues at Chester Road / Talbot Road junction and, despite issues with unforeseen ground conditions and weather before Christmas, work is now back on track and on programme.

### Planned work

Work at Chester Road is mainly within the junction of Talbot Road. This should be complete in the next few weeks and then moves onto Chester Road itself, with the remodelling of the central reservation.

Work to the third and final scheme, Great Stone Road, is due to start on the 12<sup>th</sup> of February, with the removal of the central refuge islands and reconstructing as part of the road. This means we can close a lane to remodel the footway without causing undue delays to traffic. The 12<sup>th</sup> was chosen as this is half term holiday for the nearby school and the schoolchildren will benefit from new walkways after the holidays.

More information about the project can be found at [Trafford Council/Talbot Road Upgrades](https://www.trafford.gov.uk/trafford-council/talbot-road-upgrades)
